## WORK EXPERIENCE

Quvu Live. Bringing the world together with music and eventually movies, podcasts, and more.

Connect with friends, celebrities, businesses, and brands worldwide. Share what you're listening to and see what they're listening to RIGHT NOW and listen together regardless of location. Create your own room or pop into someone else's. Listen together and chat. Add to the queue and create playlists in real time regardless of location.

**Fannan Android Application**: Fannan is a platform that matches you to top freelancers and agencies in minutes, not days. Single app for the service provider and the service seeker.Both the customer and artist need to undergo a simple registration process, after which customers can browse through different categories and find the artist that they find suitable as per their requirements.
